

CODING with CORNELL

PREPARE YOUR STUDENTS FOR A LIFETIME OF SUCCESS!

Discover the exciting world of **Coding with Cornell!** In this introductory coding series, seven-year-old Cornell guides his two-year-old sister, Cori, as she learns **Python**, one of the fastest-growing programming languages.

Through delightful rhymes and engaging stories akin to the whimsical storytelling style of Dr. Seuss, the series introduces four fundamental coding concepts used in all programming languages: **data types**, **conditional statements**, **lists**, and **loops**.

RECOMMENDED FOR READERS AGES 3-8+

"The concepts were broken down wonderfully and easy enough to explain to my 3- and 5-year-old children. Also, perfect to explain to an adult who does not have any programming knowledge!"

Kevin Denny II
Software Engineer

ABOUT THE AUTHOR

Ronesha D. Dennis is a software engineer, coding instructor, and author. Ronesha has taught coding to children aged 5-17, and college-aged students. She holds a B.A. in Communications from Howard University and a M.S. in Computer Information Systems from Boston University. In addition to **Coding with Cornell**, Ronesha is the author of **Python, the Relatable Way: For the Future Coder Who's Never Written a Line of Code** for coding beginners.
